unless you have changed plans it won't be long before you are on your way to Stockholm again. Last time you were here - en route - Mogens and I got the impression that you would like to stop over again on your way to or from Stockholm, and that this time we might induce you to talk to the microbiologists here.

Please let us know what your schedule is so that arrangements can be made. I imagine that Esther will be with you and if you want to you could make use of the guest rooms in our new building.

Best wishes to both of you
and to the Cavallis,

Ole
